

CALIFORNIA SLATE COMPANY

THE ENDURING BEAUTY OF NATURAL SLATE ROOFING.

TECHNICAL DETAILS GRAY GREEN SLATE (SEMI-WEATHERING)

Gray Green is the quintessential Vermont slate, quarried since the 19th century and trusted for its balance of strength, beauty, and natural variation. This semi-weathering slate begins as a soft gray-green and, over time, develops warm tones of buff, brown, and pink on a portion of the tiles, creating distinctive, character-rich roofs. Ideal for both historic restorations and modern projects, Gray Green combines proven durability with timeless style.

KEY FEATURES

Color & Texture:

- Medium gray to light green tones; moderately smooth with natural cleft; semi-weathering creates buff and brown hues over time.

Durability:

- Strong, dense slate with excellent resistance to freeze-thaw cycles and long-term weathering.

Workability:

- Reliable consistency; cuts and shapes well with hand tools; available in varied sizes.

Longevity:

- Service life of 100+ years with proper installation and care.

Standards:

- Meets ASTM C406 (S1 Grade) for strength, absorption, and weather resistance.

Cool Roof:

- Meets Title 24 requirements (Solar Reflectance Index).

TECHNICAL DETAILS:

Size:

16" x 10" to 16" x 8"

Thickness:

0.25" to 0.5" (7–12 mm)

Weight:

950–1,500 lbs/sq. (depending on thickness)

Provenance:

Vermont, USA

Sheen: Natural Matte finish

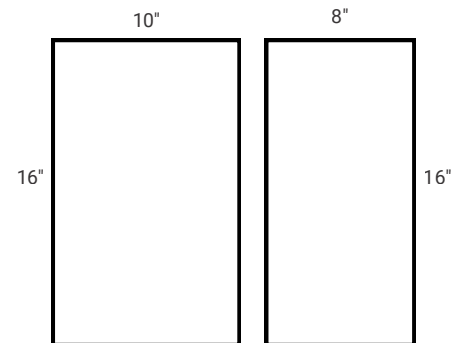

Solar Reflectance: 20%

Thermal Emittance: 0.84

SRI: 15

ASTM: S1
